

**Incident Name:** Cameron Peak Fire Support Personnel Injury (2020)

**State:** Colorado

**Date:** 8/17/20

**Incident Type:** Medical Emergency

**Description of the Incident:**

A contract fire support individual on the Cameron Peak Fire on the Arapaho and Roosevelt National Forests suffered an open compound fracture to the lower leg (tibia/fibula) when a crate landed on their leg while being unloaded. 9-1-1 was activated and the patient was transported to a local hospital via ambulance.
