

**Incident Name:** Ikes Fire Grand Canyon National Park Heat-Related Injury (2019)

**State:** Arizona

**Date:** 8/1/19

**Incident Type:** Medical (Heat-Related)

**Description of the Incident:**

On the Ikes Fire in Grand Canyon National Park, a U.S. Forest Service crewmember was showing signs of a heat-related injury and then deteriorated to the point of losing consciousness for a period. The firefighter was flown to the South Rim Helibase then taken by ground ambulance to a hospital in Flagstaff, Ariz. for further evaluation. The firefighter was treated for severe dehydration and released to light duty the following evening.
