INTRODUCTION

On February [REDACTED] 2006, the Regional Forester directed that an Escaped Prescribed Fire Review be conducted for the [REDACTED] Burn [REDACTED] Burn Project) on the [REDACTED] National Forest (NF), [REDACTED] Ranger District. An initial investigation suggested that smoldering fuel (a remnant from the prescribed fire) was pushed by strong [REDACTED] winds through containment lines during the early morning of February [REDACTED] 2006, thereby possibly causing the [REDACTED] Fire ([REDACTED]). This incident required support from fire, law enforcement, state, county and federal agencies along with a [REDACTED] Type II Incident Management Team. The fire burned approximately 10,584 acres, of which 1,968 acres were National Forest land and 8,616 acres were private land. Suppression and containment of the [REDACTED] Fire required significant expenditures of funds reaching approximately seven million dollars. The [REDACTED] Fire was returned back to District management on February [REDACTED] 2006, at 6:00 p.m.

The purpose of this review is to document the factual events leading up to, and resulting in, the apparent escaped prescribed fire, and is not intended to be an investigation of Forest personnel and the subsequent wildfire. The objectives of this review are to:

1. Determine if the project planning, layout, and the Prescribed Fire Burn Plan were adequate for the project and complied with policy and guidance related to prescribed fire planning and implementation;
2. Determine if the prescription, actions, and procedures set forth in the Prescribed Fire Burn Plan were followed; and
3. Determine the level of awareness and the understanding of the personnel involved, with regard to procedures and guidance.

National Forest**

Report: [REDACTED] 2006

Page 3 of 17

BACKGROUND

From February [REDACTED] through February [REDACTED] 2006, the review team conducted interviews with [REDACTED] NF personnel who participated in the planning and implementation of the [REDACTED] Burn Project, Line Officers, Forest Fire Staff, and Forest Service Law Enforcement Investigators. On February [REDACTED] 2006, the review team conducted an on-site visit to the project area with Forest and District employees. The review team also conducted a review of the [REDACTED] Project NEPA documentation, the Forest Fire Management Plan, the [REDACTED] Burn Plan ([REDACTED] Burn Plan), weather and fuel information, fire personnel qualifications, [REDACTED] Emergency Communications Center (ECC) Dispatch logs, and other pertinent information.

[REDACTED]

On February [REDACTED] 2006, the review team, law enforcement investigators, and Forest and District employees traveled to the [REDACTED] Burn Project site to understand the context of the project, project objectives, and burn prescription and management. This on-site visit also provided the review team a visual understanding of the project's objectives and physical factors affecting the probable escaped prescribed fire. The review team also viewed the origin of the probable fire escape and discussed the investigation procedures and findings with the law enforcement investigators. During this time, [REDACTED] briefed the review team on the project objectives, boundaries, and previously completed burned acres. [REDACTED] Burn Project fire personnel communicated to the review team that during the first day of the burn, Thursday, February [REDACTED] 2006, a decision was made to stop ignition as the fire behavior did not achieve the necessary consumption of vegetation as stated in the [REDACTED] Burn Plan prescription and burn objectives.

After the initial review, interviews, on-site visit, and document reviews were completed, a close-out briefing was performed at the [REDACTED] Ranger District office on February [REDACTED] 2006, at 3:00 p.m. The intent of the close-out briefing was

[REDACTED]

National Forest**

Report: 2006

Page 4 of 17

[REDACTED]

COMMENDATIONS

On February 2006, the Ranger District completed a successful prescribed burn of approximately 250 acres for another project called the Prescribed Fire Burn Project (Burn Project).

The objectives and goals identified in the Burn Project Decision Memo (DM) and within the Burn Plan are consistent. Additionally there are strong linkages between these documents, the Forest Fire Management Plan (FMP), and Forest Land and Resource Management Plan (LRMP).

On February 2006, during the ignition phase of the Burn Project, it was recognized that the objectives of the prescribed burn were not being met within the area referred to as the "Bowl." The Burn Boss and on-site fire leadership reviewed the current conditions and concluded that the best action would be to cease ignition operations, and begin the mop-up and patrol phase. This coordinated decision appears to have been the correct one as the desired goals, objectives, and prescriptions of the Burn Plan were not being achieved. In addition, those who made this decision realized that the predicted weather forecast called for increasing winds and projected lower humidity beginning Sunday, February 2006, through the middle of the following week.

The Forest and District personnel were forthright during the review process. They provided all documentation, personnel and information, as requested, in a timely and professional manner.

FINDINGS

The Regional Forester's Letter of Delegation to the Forest Supervisor and Review Team Leader included eight elements the review team considered in its review of the escaped prescribed fire. The following sections address those

[REDACTED]

eight elements in a narrative of the background information and review team findings.

I. Examination of the Planning Processes Including NEPA Documents, Unit Lay-out, and Strategic Considerations Used in Project Development

Background

The [REDACTED] District Ranger signed a Decision Memo (DM) for the [REDACTED] Burn Project on [REDACTED] 2004, applying Categorical Exclusion #10 Hazardous Fuels Reduction Projects Not Exceeding 4,500 acres. The [REDACTED] Burn Project documentation file contains all the pertinent specialist reports and is located at the Ranger District Office in [REDACTED]

The purpose of the [REDACTED] Burn Project was to maintain a system of fuel breaks on the [REDACTED] Ranger District. Portions of the [REDACTED] fuel break system had not been maintained for more than 10 years and were overgrown with brush. The [REDACTED] Burn Project was to be implemented over a 5-year period with areas of the fuel break system being burned on a rotational basis. The project objective was to create a fuel break consisting of lighter fuels designed to slow or stop the progress of wildfires while maintaining a safe environment for firefighters conducting suppression operations.

The DM directed that "burning would be conducted in the spring months in order to reduce the current year crop of grasses" (fine fuels). The DM also specified that heavier fuels needed to be pre-treated through cutting or crushing by hand or mechanical means. Fire crews and equipment would be staged during the ignition operations to allow monitoring of the burning operations and the suppression of any fire threatening to leave the project/unit containment lines.

Findings

- [REDACTED]
1. The category of exclusion used by the District Ranger is consistent with the ***Forest Service Handbook (FSH) 1909.15, Section 31.2 (7 CFR 1b)***. The District Ranger properly signed the DM through delegated authority assigned by the Forest Supervisor.
- [REDACTED]

Prescribed Fire Escape Review
National Forest

Report: 2006

Page 6 of 17

2. The DM and the Burn Project documentation file were in compliance with all established laws, regulations and policies. There have been no significant changes in vegetative conditions, social issues, or Forest priorities that would have created a different set of effects than those described in the DM.
3. The project activities and actions identified in the DM were utilized in the development of the Burn Plan objectives and prescription.
4. The Burn Project was an on-going operation with portions of the fuel break burned during the winter months beginning in 2005. Item (d) on page 2 of the DM states, "Use moderate to high intensity fire. Burn during the cooler spring months."

II. Review of the Technical Components of the Burn Plan

Background

The Burn Plan was approved in 2005. The Burn Plan was signed by the Forest Fire Management Officer as Acting Forest Supervisor in 2005. The technical review was also conducted by the Forest Fire Management Officer. The Forest used the appropriate Prescribed Fire Burn Plan format.

A Prescribed Fire Complexity Rating was included in the Burn Plan using the National Wildfire Coordinating Group (NWCG) format. The complexity determination for the NMD Burn Plan was found to be moderate.

Findings

1. "Each Prescribed Fire Burn Plan shall be written in the standard regionally approved format." The appropriate Region Burn Plan format is Version 5.

The District used the correct format.

2. the minimum qualifications for the approval of a Prescribed Fire Burn Plan is the Forest Supervisor or District Ranger to whom the authority has been individually re-delegated by the Forest Supervisor when approving low-to-moderate complexity prescribed fire burns.

Prescribed Fire Escape Review
National Forest

Report: 2006

Page 7 of 17

The [REDACTED] Burn Project was rated at a moderate complexity. The Forest Fire Management Officer signed the [REDACTED] Burn Plan as the Acting Forest Supervisor.

3. [REDACTED] the Forest must notify the Regional Office within 24 hours after prescribed fires or wildland fire use projects have either been declared unwanted wildfires, or create serious smoke impacts.

The [REDACTED] NF notified the Regional Office within the required 24 hours.

4. [REDACTED]
"Prepare a Wildland Fire Implementation Plan or Prescribed Fire Burn Plan, meeting minimum National Regional standards, for each wildland fire managed for resource benefits or prescribed fire project."

The following sections of the approved [REDACTED] Burn Plan met the regional requirements and instructions utilizing the [REDACTED] format, [REDACTED] Prescribed Fire Burn Plan: a) The Project Area Unit Description; b) Resource Management Goals and Objectives; c) Protection of Sensitive Features; d) Project Financing; e) Prescribed Fire Prescription; f) Firing/Ignition Procedures; g) Public Information, Pre-Burn Information/Coordination; h) Contingency Plan; and i) Post Burn Summary and Documentation.

III. Analysis of Seasonal Severity Weather Events and On-Site Conditions Leading Up to the Wildfire Declaration

Background

Seasonal Weather

The project area experienced significant drought leading up to the day of the burn on Thursday, [REDACTED] 2006, with less than a third of the normal precipitation for that time of year. Live fuel moisture readings taken on the District prior to the [REDACTED] Burn Project burn were: New Growth at 72 percent; and Old Growth [REDACTED] at 63 percent.

The [REDACTED] Burn Plan prescription for live fuel moistures ranges from 60–120 percent. The National Fire Danger Rating System (NFDRS) indices, which are available from [REDACTED] Predictive Services Center, displayed energy release components (ERCs), 1000-hour fuel moisture (FM); 100-hour FM indicating an upward trend near or at, the 90th percentile in each index [REDACTED]

[REDACTED]

General Weather

The daily weather forecast leading up to the ignition of the [REDACTED] Burn Project was generally favorable with relatively low temperatures and high humidity. High temperatures were in the mid-60s and the low relative humidity in the mid-20s. Winds generally were out of the southwest at 15 miles per hour (mph); or less. These predicted weather variables were within the prescribed fire prescription parameters.

The general weather forecasts, starting at 2:30 p.m. on Thursday [REDACTED] 2006, from the [REDACTED] Fire Weather Office and utilized for the [REDACTED] Burn Project's mop-up phase, called for "strong northeast to east winds with very low

[REDACTED]

[REDACTED] Prescribed Fire Escape Review
[REDACTED] National Forest

Report: [REDACTED] 2006

Page 10 of 17

relative humidity over [REDACTED] for Sunday, [REDACTED] 2006, through the middle of next week." [REDACTED]

The 2:00 p.m. fire weather forecast on Friday, [REDACTED] 2006, from the [REDACTED] National Weather Service included a "fire weather watch . . . for the mountains and inland valleys next week." The following weather forecasts included a fire weather watch for the area at intermittent times, which included Sunday, [REDACTED] and Monday, [REDACTED] 2006.

Specific Weather

The daily spot weather forecast for the [REDACTED] Burn Project area was received from the [REDACTED] Fire Weather Office for Thursday, [REDACTED] 2006, predicted conditions within the [REDACTED] Burn Plan prescription parameters for the time of ignition that day through Saturday, [REDACTED] 2006. The extended "outlook" called for conditions to change on Sunday, [REDACTED] and Monday, [REDACTED] 2006 -- indicating northeast to east winds ranging from 10-20 mph, with higher wind gusts.

Actual weather observations recorded at the [REDACTED] Remote Automated Weather Station showed that the [REDACTED] winds and low relative humidity occurred consistently after midnight on Sunday, [REDACTED] 2006. Steady northeast winds began around 2:30 a.m. and the relative humidity dropped from 32 percent to 22 percent during the same time period. From that point on, wind speeds increased into the 40 mph range and relative humidity fell below 20 percent. These wind speeds and relative humidity percentages continued in this range at the time the [REDACTED] Fire was reported. The winds continued to increase and relative humidity decreased into the teen percentages throughout the day on Sunday, [REDACTED] 2006.

Findings

1. At the time of the test burn and continued ignition of the [REDACTED] Burn Project on Thursday, [REDACTED] the extended weather forecasts were favorable with the predicted outlook indicating north, northeast 10-20 mph winds with higher wind gusts on Sunday, [REDACTED] and Monday, [REDACTED] 2006. The general weather forecast predicted stronger winds for Sunday, [REDACTED] 2006, and into the middle of the following week.
 2. The weather forecast specifications in the [REDACTED] Burn Plan states, "Long-term weather forecast should reflect favorable weather outlook for at least
- [REDACTED]

Prescribed Fire Escape Review
National Forest

Report: /2006

Page 11 of 17

one week after each section is completed with no wind event predicted."
The Burn Plan does not define the environmental parameters that would constitute a favorable weather outlook or a wind event. The wind speed in the Burn Plan prescription calls for "Calm-15 mph." The weather outlook from the Predictive Services Center forecasted 10-20 mph with higher gusts on Sunday, and Monday, 2006. The general weather long-term forecast used stronger language calling for strong winds and low relative humidity.

IV. A Review of Qualifications and Experience of Key Personnel

Background

The review team coordinated with the Emergency Communication Center (ECC) Dispatch to document the fire qualifications for the personnel assigned to the Burn Project. The system that is currently in place and being utilized by the National Forest is the Incident Qualification and Certification System (IQCS). This system tracks each employee for qualifications to accomplish certain tasks, competency proficiencies, fire experience and skills, and training or assignment dates. This system is currently being updated to reflect the most current qualifications and certifications.

V. Actions Taken Leading Up to the Wildfire Declaration

Background

Thursday, 2006:

- At 7:00 a.m., fire personnel traveled from duty stations to the Burn Project. On-route, the DFMO and Forest Service Fire Engine checked on the Burn Project.
- At 9:00 a.m., the initial on-site weather was taken.
- At 9:30 a.m., the Burn Boss began the ignition phase of the Burn Project which included briefings with the burning crews, holding crews, and other personnel concerning safety, prescribed fire operations, weather and assignments.
- The "Go-No-Go" checklist was completed.
- At 10:00 a.m., the test burn was started and successfully completed at 10:20 a.m. – which appeared to meet the resource objectives within Burn Plan.
- At 10:20 a.m., the Burn Boss made the decision to continue the Burn Project burning operation.
- At 1:30 p.m., the Burn Boss met with the Burn Boss trainee and to discuss the progress of the Burn Project. They determined that the continuation of the burn would not achieve the resource objectives of the Burn Plan.
- At 2:07 p.m., the Burn Boss ceased burning, released the hand crews, and directed the remaining burn organization to begin the mop-up and patrol phase for the burned area with the exception of the "bowl area"- which is approximately one acre.
- At 3:00 p.m., the Burn Boss assigned Forest Service Fire Engine and the crew to mop-up and patrol the Burn Project on Friday, 2006.
- At 4:18 p.m., Fire Engine was released from the Burn Project.
- At 4:25 p.m., all resources (with the exception of) were released from the Burn Project and returned to the station.
- At 7:30 p.m., returned to the station and notified the ECC Dispatch that there were "no smokes showing."
- Weather observations were taken at 9:00 a.m., 9:45 a.m., 10:30 a.m., 11:45 a.m., and 12:45 p.m.

**Prescribed Fire Escape Review
National Forest**

Report: [REDACTED]

Page 13 of 17

Friday, [REDACTED] 2006:

- At 7:00 a.m., the [REDACTED] crew and [REDACTED] went into service. Their assignment was to mop-up all residual smokes and to patrol the [REDACTED] Burn Project.
- At 7:30 a.m., the fire duty officer briefed the [REDACTED] crew and [REDACTED] at the [REDACTED] Station on their assignments, weather, and safety for the day. After the briefing, they departed to the [REDACTED] Burn Project.
- At 9:48 a.m., the [REDACTED] crew and [REDACTED] arrived at the [REDACTED] Burn Project.
- At 3:07 p.m., [REDACTED] and the [REDACTED] crew left the [REDACTED] Burn Project.
- At 4:00 p.m., [REDACTED] and the [REDACTED] crew arrived at the [REDACTED] Station. The District's Fire Captain called the [REDACTED] crew to inquire on the status of the [REDACTED] Burn Project. The [REDACTED] crew reported that all residual smokes were extinguished.
- At 5:30 p.m., [REDACTED] and the [REDACTED] crew went off duty.

Saturday, [REDACTED] 2006:

- At 8:00 a.m., [REDACTED] returned to the other prescribed burn on the District, the [REDACTED] Burn Project.

Sunday, [REDACTED] 2006:

- At 10:00 a.m., Forest Service Fire Engine [REDACTED] traveled to the [REDACTED] Burn Project.
- At 10:15 a.m., [REDACTED] was notified by the [REDACTED] ECC Dispatch that there were smokes being reported in the [REDACTED] Burn Project area.
- At 10:30 a.m., Forest Service Patrol [REDACTED] departed for the [REDACTED] Burn Project to patrol the [REDACTED] Burn Project from the road.
- At 11:00 a.m., [REDACTED] and another firefighter arrived at the [REDACTED] Burn Project.
- At 11:20 a.m., [REDACTED] and the other firefighter returned to the [REDACTED] Station.
- At 4:00 p.m., [REDACTED] and [REDACTED] arrived back at [REDACTED] Station.
- At 4:30 p.m., all fire personnel declared off-duty.

Monday, [REDACTED] 2006:

- At 4:35 a.m., the [REDACTED] ECC Dispatch notified [REDACTED] of fire being reported at the [REDACTED] Burn Project.
- [REDACTED]

Prescribed Fire Escape Review
National Forest

Report: 2006

Page 14 of 17

- At 5:00 a.m., District Fire Captain [REDACTED] arrived at the [REDACTED] Burn Project.
- At 6:03 a.m., [REDACTED] notified the [REDACTED] ECC Dispatch of "fire outside of prescription."

Findings

1. The District assigned [REDACTED] and a six-person [REDACTED] crew to mop-up and patrol the [REDACTED] Burn Project on Friday, [REDACTED] 2006. They returned to the [REDACTED] Station at approximately 3:00 p.m. and reported no smokes detected. On Saturday, [REDACTED] 2006, no resources were assigned to the [REDACTED] Burn Project. On Sunday, [REDACTED] 2006, the District staffed two fire engines. [REDACTED] responded to the [REDACTED] Burn Project to mop-up reported smokes. The second engine [REDACTED] remained at the [REDACTED] Station available for initial attack or to support mop-up at the [REDACTED] Burn Project if smokes were discovered.
2. On Sunday, [REDACTED] 2006, [REDACTED] and another firefighter were diverted to the [REDACTED] Burn Project from the [REDACTED] Station. [REDACTED] and the other firefighter arrived on the [REDACTED] Burn Project at approximately 11:00 a.m. and observed the burn area from the road for 20 minutes before returning to [REDACTED] Station. They reported no smokes.
3. Prior to the weekend [REDACTED] 2006, the DFMO sent e-mail notes to his immediate staff addressing the predicted wind situation, [REDACTED] message stated that [REDACTED] wanted the "two fires to be secured and patrolled over the weekend." The DFMO had no further communications with his crew.
4. [REDACTED]
5. No mop-up on the [REDACTED] Burn Project occurred on Saturday, [REDACTED] or Sunday, [REDACTED] 2006. A patrol along the road, which was the upper control line, was conducted on Sunday, [REDACTED] 2006.

VI. Causal Agents Contributing to Wildfire

Findings

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

VII. Examination of Local Prescribed Fire Operational and Decision-Making Procedures

Findings

1. The DM was signed on [REDACTED] 2004, and is in compliance with all laws, regulations, and policies. There were no significant changes in vegetative conditions, social issues, or Forest priorities that influenced the consequences of the escaped fire.
2. The [REDACTED] Burn Plan was approved in [REDACTED] 2005, and is consistent with the goals and objectives found in the DM and resource specialist reports.
3. Locally, the District utilizes Forest Service employees (either on District or adjacent Districts), [REDACTED] personnel and crews, and other cooperating agencies for prescribed fire projects.
4. All coordination functions with the media, other agencies, Forest Staff and Line Officers, [REDACTED] ECC Dispatch, Predictive Services Center, etc. were clearly documented and followed.
5. A [REDACTED] Burn Project briefing was held on Thursday, [REDACTED] 2006, with burning crews, holding crews and other fire personnel and was completed according to agency standards. A test burn was conducted, and the Burn Boss [REDACTED] established that the results were within the [REDACTED] Burn Plan Prescribed Fire Prescription Section's environmental parameters; therefore, the decision was made to proceed with ignition.
6. As the [REDACTED] Burn Project was progressing on Thursday, [REDACTED] 2006, the Burn Boss [REDACTED] in consultation with other key fire leadership, concluded that the fire was not effectively spreading within the [REDACTED] Burn Project area, or sufficiently consuming the brush according to project objectives. The Burn Boss [REDACTED] ordered firing to cease and mop-up to begin.

Emergency Evacuation Instructions (Reference FSH 6705)

Work supervisors and crew members are responsible for developing and discussing field emergency evacuation procedures (EEP) and alternatives in the event a person(s) becomes seriously ill or injured at the worksite.

Be prepared to provide the following information:

- a. Nature of the accident or injury (avoid using victim's name).
- b. Type of assistance needed, if any (ground, air, or water evacuation).
- c. Location of accident or injury, best access route into the worksite (road name/number), identifiable ground/air landmarks.

d. Radio frequencies.

- d. Radio frequencies.
- e. Contact person.
- f. Local hazards to ground vehicles or aviation.
- g. Weather conditions (wind speed & direction, visibility, temperature).
- h. Topography.
- i. Number of individuals to be transported.
- j. Estimated weight of individuals for air/water evacuation.

The items listed above serve only as guidelines for the development of emergency evacuation procedures.

- JHA and Emergency Evacuation Procedures Acknowledgment**
We, the undersigned work leader and crew members, acknowledge participation in the development of this JHA (as applicable) and accompanying emergency evacuation procedures. We have thoroughly discussed and understand the provisions of each of these documents:

FIRE WEATHER UNIT
GEOGRAPHICAL AREA COORDINATION CENTER

0630 Thursday, February 9, 2006

SYNOPSIS...

A ridge of high pressure will bring a little warmer temperatures and a little lower humidity today. Winds will remain light today.

Forecast for Today...

Weather.....Mostly sunny.
High temps.....Near 70.
Minimum humidity.....35%
Eye-Level winds.....Northeast to southeast 2 to 4 mph in the morning becoming southwest to northwest 5 to 10 mph in the afternoon.
Transport winds.....East 3 mph in the morning becoming west 8 mph in the afternoon.
Mixing Depth.....100 feet agl increasing to 2000 feet agl by afternoon.
Inversions.....Weak inversion breaking late morning.

Forecast for Tonight...

Weather.....Mostly clear.
Low temps.....Near 40.
Maximum humidity.....80%
Eye-Level winds.....Northeast to southeast 2 to 4 mph after sunset.
Transport winds.....East 3 mph after sunset.
Mixing Depth.....Lowering to 100 feet by 2200 hours.
Inversions.....Weak inversion setting up after 2200 hours.

Forecast for Friday...

Weather.....Mostly sunny.
High temps.....Mid 70s.
Minimum humidity.....30%
Eye-Level winds.....Northeast to southeast 2 to 4 mph in the morning becoming southwest to northwest 5 to 10 mph in the afternoon.
Transport winds.....East 3 mph in the morning becoming west 8 mph in the afternoon.
Mixing Depth.....100 feet agl increasing to 2000 feet agl by afternoon.
Inversions.....Weak inversion breaking late morning.

The outlook for Saturday through Monday...
Mostly sunny. Little change in temperature with lower humidity. Winds southeast to southwest 5 to 10 mph in the afternoon Saturday afternoon and northeast to east 10 to 20 mph with higher gusts Sunday and Monday.

SYNOPSIS...

A ridge of high pressure will bring a little warmer temperatures and a little lower humidity through Thursday. Winds will remain fairly light through Thursday.

Forecast for Today...

Weather.....Mostly sunny.
High temps.....Near 70.
Minimum humidity.....30%.
Eye-level winds.....Northwest to northeast 3 to 6 mph in the morning becoming southeast to southwest 5 to 10 mph in the afternoon.
Transport winds.....North 4 mph in the morning becoming south 8 mph in the afternoon. Mixing height 100 feet, increasing to 2,000 feet agl by mid afternoon.

Forecast for Tonight...

Weather.....Mostly clear.
Low temps.....Near 40.
Maximum Humidity.....70%.
Eye-level winds.....Northwest to northeast 3 to 6 mph after sunset.
Transport winds.....North 4 mph. Mixing height lowering to 100 feet late night.

Forecast for Thursday...

Weather.....Mostly sunny.
High temps.....Mid 70s.
Minimum humidity.....30%.
Eye-level winds.....Northwest to northeast 3 to 6 mph in the morning becoming southeast to southwest 5 to 10 mph in the afternoon.
Transport winds.....North 4 mph in the morning becoming south 8 mph in the afternoon. Mixing height 100 feet, increasing to 2,000 feet agl by mid afternoon.

The outlook for Friday through Sunday.

Mostly sunny. A little warmer and drier Friday then a little cooler with little change in humidity Saturday and Sunday. Winds southeast to southwest 5 to 10 mph in the afternoons.

Weather observations from: [REDACTED]

FIRE WEATHER WATCH
NATIONAL WEATHER SERVICE
238 PM SAT FEB 2006

...FIRE WEATHER WATCH FOR THE MOUNTAINS AND VALLEYS NEXT
WEEK...

OFFSHORE FLOW WILL DEVELOP SUNDAY BRINGING DRY AIR AND LOCALLY GUSTY
WINDS TO THE REGION. THE FLOW WILL CONTINUE THROUGH
MUCH OF THE UPCOMING WEEK. RELATIVE HUMIDITY WILL DECREASE TO 15
PERCENT OR LOWER SUNDAY AFTERNOON IN THE MOUNTAINS WITH SLIGHT
RECOVERY AT NIGHT. THE STRONGEST WINDS ARE NOW EXPECTED TUESDAY
NIGHT AND WEDNESDAY MORNING. WHILE THE WILDFIRE THREAT WILL BE
HEIGHTENED OVER THE NEXT FEW DAYS...INDICATIONS ARE THAT RED FLAG
CRITERIA WILL NOT BE MET UNTIL WINDS INCREASE FURTHER ON TUESDAY
NIGHT OR WEDNESDAY. WHILE CONSIDERABLE UNCERTAINTY REMAINS WITH
THE DEVELOPMENT OF THIS SYSTEM...THE FIRE WEATHER WATCH HAS BEEN
PUSHED BACK TO LATE FEB. AFTER TUESDAY...IT APPEARS THE VERY LOW
HUMIDITY CRITERIA WILL BE SUSTAINABLE FOR A LONGER PERIOD OF TIME
IN MANY AREAS.

FIRE WEATHER WATCH

NATIONAL WEATHER SERVICE
106 AM SUN FEB 2006

...FIRE WEATHER WATCH FOR THE MOUNTAINS AND VALLEYS TONIGHT
AND MONDAY AND AGAIN TUESDAY NIGHT AND WEDNESDAY...

...FLOW HAS DEVELOPED AND DRIED THE AIR MASS. MOST LOCATIONS
ARE ALREADY AT OR BELOW 15 PERCENT AND LITTLE TO NO RECOVERY OF
RELATIVE HUMIDITY IS EXPECTED TONIGHT. SINCE WINDS ARE EXPECTED TO
INCREASE TONIGHT...RED FLAG CRITERIA COULD BE MET...SO A FIRE
WEATHER WATCH HAS BEEN ISSUED FOR TONIGHT AND MONDAY MORNING. WINDS
ARE FORECAST TO DIMINISH MONDAY AFTERNOON THROUGH TUESDAY
MORNING...BUT INCREASE AGAIN TUESDAY NIGHT...SO A FIRE WEATHER WATCH
IS ALSO IN EFFECT FOR TUESDAY NIGHT THROUGH WEDNESDAY.

COUNTIES EXCLUDING THE NATIONAL FOREST-

COUNTY
COUNTY
COUNTY
106 AM SUN FEB 2006

...FIRE WEATHER WATCH IN EFFECT FROM THIS EVENING THROUGH MONDAY
AFTERNOON...

...FIRE WEATHER WATCH REMAINS IN EFFECT FROM TUESDAY AFTERNOON
THROUGH WEDNESDAY AFTERNOON...

THE NATIONAL WEATHER SERVICE IN [REDACTED] HAS ISSUED A FIRE
WEATHER WATCH...WHICH IS IN EFFECT FROM THIS EVENING THROUGH
MONDAY AFTERNOON. A FIRE WEATHER WATCH REMAINS IN EFFECT FROM
TUESDAY AFTERNOON THROUGH WEDNESDAY AFTERNOON.

DESPREAD HUMIDITY AT OR BELOW 15 PERCENT IS LIKELY WITH LITTLE TO
NO RECOVERY AT NIGHT THROUGH WEDNESDAY.

FOR TONIGHT THROUGH MONDAY MORNING...NORTHEAST WINDS GUSTING OVER 35
MPH ARE POSSIBLE.

FOR TUESDAY NIGHT THROUGH WEDNESDAY...NORTHEAST WINDS GUSTING OVER
15 MPH ARE POSSIBLE..

A FIRE WEATHER WATCH MEANS THAT CRITICAL FIRE WEATHER CONDITIONS
ARE FORECAST TO OCCUR. LISTEN FOR LATER FORECASTS AND POSSIBLE
RED FLAG WARNINGS.

38

FIRE WEATHER PLANNING FORECAST FOR EXTREME
NATIONAL WEATHER SERVICE
330 PM SUN FEB 2006

...A RED FLAG WARNING HAS BEEN ISSUED FOR THE MOUNTAINS...
VALLEYS...AND PORTIONS OF THE COUNTY PLAIN
NEAR THE FOOTHILLS THROUGH WEDNESDAY...

.DISCUSSION... FLOW HAS DEVELOPED AND CRIED THE AIR MASS.
MOST LOCATIONS ARE ALREADY AT OR BELOW 15 PERCENT RELATIVE HUMIDITY
AND LITTLE TO NO RECOVERY IS EXPECTED TONIGHT. SINCE WINDS ARE
EXPECTED TO INCREASE TONIGHT...RED FLAG CRITERIA IS EXPECTED OVER
MOST AREAS...EITHER FROM A COMBINATION OF WIND AND LOW
RELATIVE HUMIDITY...OR JUST FROM AN EXTENDED PERIOD OF RELATIVE
HUMIDITY BELOW TEN PERCENT. WINDS ARE FORECAST TO DECREASE SOMEWHAT
TODAY AFTERNOON THROUGH TUESDAY MORNING...BUT RELATIVE HUMIDITY
WILL BE EXTREMELY LOW...SO FIRE WEATHER CONDITIONS ARE EXPECTED TO
BE CRITICAL THROUGH WEDNESDAY IN MANY AREAS.

...EXCLUDING THE NATIONAL FOREST-

SUNDAY...MOSTLY CLEAR. LOWS 43 TO 53. HIGHS 73 TO 78.

FIRE WEATHER WATCH
NATIONAL WEATHER SERVICE
335 PM SUN FEB 2006

...FIRE WEATHER WATCH FOR THE MOUNTAINS AND VALLEYS
TONIGHT AND MONDAY AND AGAIN TUESDAY NIGHT AND WEDNESDAY...

FLOW HAS DEVELOPED AND DRIED THE AIR MASS. MOST
LOCATIONS ARE ALREADY AT OR BELOW 15 PERCENT AND LITTLE TO NO
RECOVERY OF RELATIVE HUMIDITY IS EXPECTED TONIGHT. SINCE WINDS
ARE EXPECTED TO INCREASE TONIGHT...RED FLAG CRITERIA COULD BE
MET...SO A FIRE WEATHER WATCH HAS BEEN ISSUED FOR TONIGHT AND
MONDAY MORNING. WINDS ARE FORECAST TO DECREASE SOMEWHAT MONDAY AFTERNOON
THROUGH TUESDAY MORNING...BUT RELATIVE HUMIDITY WILL BE EXTREMELY
LOW SO FIRE WEATHER CONDITIONS MAY BE CRITICAL THROUGH WEDNESDAY.

...COUNTY

335 PM SUN FEB 2006

...FIRE WEATHER WATCH REMAINS IN EFFECT FROM 10 PM THIS
EVENING THROUGH MONDAY AFTERNOON...
...FIRE WEATHER WATCH REMAINS IN EFFECT FROM TUESDAY AFTERNOON
THROUGH WEDNESDAY AFTERNOON...

A FIRE WEATHER WATCH REMAINS IN EFFECT FROM 10 PM THIS
EVENING THROUGH MONDAY AFTERNOON. A FIRE WEATHER WATCH REMAINS IN
EFFECT FROM TUESDAY AFTERNOON THROUGH WEDNESDAY AFTERNOON.

WIDESPREAD HUMIDITY AT OR BELOW 15 PERCENT IS LIKELY WITH LITTLE
TO NO RECOVERY AT NIGHT THROUGH WEDNESDAY.

FOR TONIGHT THROUGH MONDAY MORNING...NORTHEAST WINDS GUSTING OVER
15 MPH ARE POSSIBLE.

A FIRE WEATHER WATCH MEANS THAT CRITICAL FIRE WEATHER CONDITIONS
ARE FORECAST TO OCCUR. LISTEN FOR LATER FORECASTS AND POSSIBLE RED
FLAG WARNINGS.

RED FLAG WARNING

NATIONAL WEATHER SERVICE

11 PM SUN FEB 2006

...A RED FLAG WARNING HAS BEEN ISSUED FOR THE MOUNTAINS...
VALLEYS...AND PORTIONS OF THE COUNTY PLAIN
NEAR THE FOOTHILLS THROUGH WEDNESDAY...

FLOW HAS DEVELOPED AND DRIED THE AIR MASS. MOST
LOCATIONS ARE ALREADY AT OR BELOW 15 PERCENT RELATIVE HUMIDITY AND
LITTLE TO NO RECOVERY IS EXPECTED TONIGHT. SINCE WINDS ARE
EXPECTED TO INCREASE TONIGHT...RED FLAG CRITERIA IS EXPECTED OVER
MOST INLAND AREAS...EITHER FROM A COMBINATION OF WIND AND LOW
RELATIVE HUMIDITY...OR JUST FROM AN EXTENDED PERIOD OF RELATIVE
HUMIDITY BELOW TEN PERCENT. WINDS ARE FORECAST TO DECREASE
SOMEWHAT MONDAY AFTERNOON THROUGH TUESDAY MORNING...BUT RELATIVE
HUMIDITY WILL BE EXTREMELY LOW...SO FIRE WEATHER CONDITIONS ARE
EXPECTED TO BE CRITICAL THROUGH WEDNESDAY IN MANY AREAS.

COUNTY

COUNTIES EXCLUDING THE NATIONAL FOREST-

COUNTY

COUNTY

COUNTY

COUNTY

11 PM SUN FEB 2006

...RED FLAG WARNING IN EFFECT UNTIL 4 PM WEDNESDAY...

THE NATIONAL WEATHER SERVICE IN HAS UPGRADED THE FIRE
WEATHER WATCH TO A RED FLAG WARNING...WHICH IS IN EFFECT UNTIL 4
PM WEDNESDAY.

DESPREAD HUMIDITY AT OR BELOW 10 PERCENT IS LIKELY WITH LITTLE
NO RECOVERY AT NIGHT THROUGH WEDNESDAY.

IN ADDITION...FOR TONIGHT THROUGH MONDAY MORNING...AREAS OF
NORTHEAST WINDS GUSTING OVER 35 MPH ARE LIKELY THROUGH AND BELOW
MOUNTAIN PASSES AND CANYONS.

FOR MONDAY NIGHT THROUGH WEDNESDAY PERIODS OF EAST WINDS 15 TO 25
MPH WITH LOCALLY HIGHER GUSTS THROUGH AND BELOW PASSES AND CANYONS
ARE LIKELY. IN ADDITION...RELATIVE HUMIDITY BELOW 10 PERCENT WILL
PREVAIL FOR EXTENDED PERIODS.

A RED FLAG WARNING MEANS THAT CRITICAL FIRE WEATHER CONDITIONS
ARE EITHER OCCURRING NOW...OR WILL SHORTLY. A COMBINATION OF
STRONG WINDS...LOW RELATIVE HUMIDITY...AND WARM TEMPERATURES WILL
CREATE EXPLOSIVE FIRE GROWTH POTENTIAL.

14

COUNTY/ALL AREAS OF THE COUNTY EXCLUDING THE
NATIONAL FOREST-

11 PM SUN FEB 2006

...RED FLAG WARNING IN EFFECT UNTIL 4 PM WEDNESDAY...

THE NATIONAL WEATHER SERVICE IN HAS ISSUED A RED FLAG
WARNING...WHICH IS IN EFFECT UNTIL 4 PM WEDNESDAY.

LOCALLY STRONG AND GUSTY WINDS WILL BE DEVELOPING BELOW
THE CANYONS OF THE MOUNTAINS. AREAS OF WINDS AT OR ABOVE
25 MPH WITH RELATIVE HUMIDITY BELOW 15 PERCENT ARE LIKELY TO
DEVELOP AND PERSIST INTO MIDDAY MONDAY.

THE WINDS ARE EXPECTED TO DECREASE BELOW CRITICAL LEVELS MONDAY
AFTERNOON...BUT VERY LOW RELATIVE HUMIDITY...BELOW 10 PERCENT...
LIKELY TO PERSIST IN SOME AREAS NEAR THE FOOTHILLS THROUGH
WEDNESDAY.

. RED FLAG WARNING MEANS THAT CRITICAL FIRE WEATHER CONDITIONS
ARE EITHER OCCURRING NOW...OR WILL SHORTLY. A COMBINATION OF
STRONG WINDS...LOW RELATIVE HUMIDITY...AND WARM TEMPERATURES WILL
CREATE EXPLOSIVE FIRE GROWTH POTENTIAL.

Synopsis of Significant [REDACTED] Fire Suppression Activities

Feb. [REDACTED] thru Feb [REDACTED]

The [REDACTED] Fire started at approximately 0427 hours on February [REDACTED] 2006, in the area of [REDACTED] in the [REDACTED] National Forest. Initial Attack (IA) response consisted of resources from [REDACTED] National Forest, (USFS), [REDACTED], and [REDACTED] County [REDACTED].

At approximately 0547, IA resources entered into a Unified Command structure. The incident complexity and rapid rates of spread resulted in the Forest ordering a Type II incident management team. [REDACTED] Incident Management Team [REDACTED] with [REDACTED] as Incident Commander was ordered. The [REDACTED] had set up a command post at [REDACTED] Park which had initiated ICS command, planning and logistical support functions with [REDACTED] as Incident Commander.

. The fire burned 10,584 acres and in its initial phases required a fire camp to support over 2300 personnel. The fire impact area involved National Forest Responsibility Area [REDACTED], State Responsibility Area [REDACTED] and [REDACTED] County Direct Protection Area [REDACTED].

A significant threat to structures existed in the cities of [REDACTED] and [REDACTED]. This necessitated entering into a Unified Command organization with US Forest Service (USFS), [REDACTED], [REDACTED] County [REDACTED], City [REDACTED] Fire Department, and the City [REDACTED] Fire Department. [REDACTED] also activated an incident management team, [REDACTED] Team [REDACTED] with [REDACTED] as Incident Commander with personnel shadowing [REDACTED] providing support and assistance.

A Red Flag Warning was in effect for the area due to strong northeast wind event coupled with continued low humidity's. The rapid rates of spread and extreme fire behavior were directly related to these conditions. Structure protection was established in the Cities of [REDACTED]. An evacuation of over 2400 homes in the City of [REDACTED] incident Perimeter Control and Structure Protection contingency plan was developed for the [REDACTED] and [REDACTED] areas and preparations were made to implement should conditions warrant. The plan proved itself to be effective when a blow-out occurred along the southern flank.

Transition to a Unified Type III organization with [REDACTED] (USFS), [REDACTED] and [REDACTED] as Incident Commanders occurred on February [REDACTED] 2006 at 1800 hours.

February 2006

The team Incident Commander received a pre-alert of a potential activation to the [REDACTED] National Forest at 0800 hrs and received confirmation of the order at 0915hrs that same morning. The order in ROSS of the team members was sent out to the forests by [REDACTED] at 0935hrs.

The in-brief for the team was held at 1600 hours at the [REDACTED] County Fire headquarters and was covered for the team by [REDACTED]. At that in-brief the team was informed that the fire was to be managed in unified command with [REDACTED] City and [REDACTED] City. [REDACTED] was designated as the representative for the cities and filled that role during the time period that unified command with the cities was in effect.

[REDACTED] Team was also activated to serve as support/shadows for the members of [REDACTED]. The unified IC's and the forest staff meet at 2000hrs to discuss the overall management of the incident

February 2006

A transition to [REDACTED] occurred at 0600. The initial operational briefing was conducted at [REDACTED] Park

[REDACTED] National Forest S.O. and district staff officers maintained a continual presence at the incident base to provide support and assistance. This presence ensured separation of the ongoing fire cause investigation and associated media coverage from becoming a distraction to the IMT.

Evacuation was lifted for all residents at 1600 hours. Hwy [REDACTED] remained closed.

A press briefing was held by [REDACTED] to release the information regarding the probable cause being an escape from a [REDACTED] Rx burn.

When we lifted the evacuation of the City's [REDACTED] and [REDACTED] they dropped out of Unified Command but remained as Agency Rep.

February 2006

Contingency planning efforts were initiated on the southern and northern areas of the fire today to identify and staff-out options should current planned and secondary lines fail. Operations were successful leaving only the north end of the fire open at the end of shift.

At approximately 2330 hours an interior island flared up burning about 100 acres and throwing embers across the fireline. The total acreage of the slop-over was less approximately 2 acres .. The slop over was contained by the beginning of day shift 2.

February 1, 2006

The slop over was contained by the beginning of day shift at approximately 2 acres.

The focus was shifted to down-sizing the organization considering the significant progress that was made on the incident.

February 2, 2006

Combined Command and General Staff met with [REDACTED] Team [REDACTED] members, [REDACTED] County team members and [REDACTED] at 0800 to close out [REDACTED] Team [REDACTED] leaving the incident. General discussion was around how well things went with so many team members in a shadow or deputy role from different agencies. It was a really good meeting as the cooperation among the agencies was outstanding.

As of February 2, 2006, the final Incident Status Summary (ICS-209) has \$1,000,000.00 as the total suppression costs.

Entry Date/Time	From	To	Details
02/07/2006 04:35:57			Late entry. Advised [REDACTED] of the possible vegetation fire in the [REDACTED] area and asked if I could have [REDACTED] start a response
02/07/2006 04:37:12			Could you start a response to the [REDACTED] area on [REDACTED] for a vegetation fire
02/07/2006 04:38:11			We will start a response
02/07/2006 04:39:02			Could you start a response to the [REDACTED] for a possible vegetation fire
02/07/2006 05:12:57			Sent a page to the Forest Supervisor about the fire in the [REDACTED] area
02/07/2006 05:18:31			Left message with [REDACTED] about the vegetation fire in the [REDACTED] area
02/07/2006 05:19:55			The response from [REDACTED] is [REDACTED], [REDACTED], and [REDACTED]
02/07/2006 05:21:20			The response from [REDACTED] is [REDACTED], [REDACTED], and [REDACTED]
02/07/2006 05:29:17			Were you able to copy [REDACTED] report on conditions
02/07/2006 05:32:12			That is negative
02/07/2006 05:45:39			It is reported as 5-10 acres and it is on top near [REDACTED] and [REDACTED] County has a dozer enroute and the gus are up to 30 mph
02/07/2006 05:59:00			This fire has about 40 to 50 ft flamelengths and it is spotting ahead of itself about 1/4 mile from what I am looking at.
02/07/2006 06:03:57			It is now outside of prescription and we are going to need handcrews and helicopters and airtankers
02/07/2006 06:11:52			I am requesting a type 2 team for this fire
02/07/2006 06:27:14			Could you order 2 additional strike teams of Forest Service Engines and have them respond to [REDACTED] and there i two branches and we are taking one and [REDACTED] County w take the other branch.
02/07/2006 07:04:15			I would like to request one Air Attack, one Lead Plane, and as many type 1 fixed wing as possible
02/07/2006 08:19:22			REQUESTING [REDACTED]
02/07/2006 08:53:25			ASSUMING IC- UNIFIED COMMAND W/ [REDACTED] & [REDACTED] V [REDACTED] LITTLE CONTROL BURNING TO NNW 4-500 AC
02/07/2006 13:54:37			All requests will be master mutual aid with the exception of the requests from [REDACTED] which will be [REDACTED]
02/07/2006 19:12:44			UTILITY [REDACTED], [REDACTED] AND [REDACTED] W/ [REDACTED] TRAILERS TO THE FIRE
02/07/2006 08:17:12			[REDACTED] FROM [REDACTED] RETURNING
02/07/2006 10:11:58			reld [REDACTED], [REDACTED], and [REDACTED] returning to mgr unit.
02/07/2006 16:19:52			Fire returned to Forest @ 1800 today. A Type 3 IC, [REDACTED] will assume the fire @ 1800
02/07/2006 18:18:31			Utility 20 is staffed w/ [REDACTED] w/1 and will be patrolling the fire all night.
02/07/2006 21:21:49			FIVE AGO- [REDACTED] CHANGE IN LOCATION TO [REDACTED]
02/07/2006 22:10:17			[REDACTED] NEW LOCATION, [REDACTED]
02/07/2006 23:07:39			[REDACTED] HAD TO CHANGE A FLAT TIRE, THEY'RE [REDACTED] IN SERVICE TOWARDS [REDACTED]
02/07/2006 01:29:08			[REDACTED] NOW I/S TO [REDACTED]
02/07/2006 02:45:48			LOCATION IS N. [REDACTED]
02/07/2006 04:43:21			I/S TO [REDACTED]

Prescribed Fire
Burn Progression Map

↑ Handline for Ex-burn

← Area of Escape

① Over-extension of District Resources.

There were not enough personnel to staff all available ^{District} engines. ^{There were six engines that were ~~operational~~} The District was only able to staff 3 engines on Saturday/Sunday. On Sunday two engines responded to [REDACTED] prescribed fire after reported smokes. One engine remained at the [REDACTED] station for ~~availability~~ available for initial attack. No engines were available for the

[REDACTED]
Burnon: Sunday

- ② There were Command and Control Issues within the leadership of the [REDACTED] Ranger District Fire Management Staff. Following the ignition and immediate holding efforts, the District does not appear to have established a well understood chain-of-command. This led to dis-jointed communications and lack of clear orders.
