

Incident Name: Cameron Peak Fire Hand Crew Member Smoke Inhalation (2020)

State: Colorado

Date: 8/24/20

Incident Type: Medical

Description of the Incident:

On the Cameron Peak Fire on the Arapaho and Roosevelt National Forests, a contract hand crew member complained of chest pain radiating to arm. The patient was transported via ground ambulance to a hospital and diagnosed with smoke inhalation and altitude sickness. The patient was treated and released to light duty.
