

Date: 6/22/17

State: Oregon

Resource Type: Contract Type 2IA Crew

Incident Type: Medical or Exertion or Heat

Medical Condition: Rhabdomyolysis

Description of the incident:

During fireline mop up operations, the patient started to feel dizzy, had a loss of balance, and was shaking uncontrollably. The patient's symptoms included overall weakness, decreased coordination, and fatigue.

The patient was provided with IV fluids and transported to the hospital. The patient was diagnosed with rhabdomyolysis. The firefighter was released after spending two days in the hospital.
