

**Incident Name:** Little Soda Fire Rhabdomyolysis (2020)

**State:** California

**Date:** 7/30/20

**Incident Type:** Heat – Rhabdomyolysis

**Description of the Incident:**

While working on the Little Soda Fire on the Klamath National Forest, a handcrew member suffered from heat stress and was diagnosed with rhabdomyolysis. The patient was transported via ground ambulance to a local medical center and was admitted for treatment. A Hospital Liaison was assigned, an AAR was conducted, and a Heat-Related Illness (HRI) questionnaire will be submitted.
